

Ulmus glabra 'camperdownii (Weeping Standard)'

WEEPING ELM

This tree is a grafted standard form of Elm. It has large elliptical leaves which are slightly serrated at the edges and turn yellow in autumn. The tree forms a lovely weeping habit that falls all the way to the ground.

Ideal as a specimen tree for parks and gardens. Great for smaller gardens.

Prefers a moist, well drained soil. Slightly acid to slightly alkaline soil is best. Prefers full sun. Good tolerance to air pollution.

Foliage Deciduous

Form Round

Mature Size 1.5-1.8m graft

Family Ulmaceae

Deciduous

Round
