

Waterhousea floribunda 'ST1' Whisper (syn. Syzygium)

WHISPER WEEPING LILLY PILLY

Unique to Speciality Trees and our best-selling and most popular tree! This is a versatile, bushy tree with a wonderful weeping habit making it perfect for large screening projects and the softening of fence lines. Propagated from Victorian mother-stock, unlike other Waterhousea, so responds better to all weather conditions, including cooler climates. New growth starts off pink with leaves turning to various shades of green as the foliage matures. Foliage is maintained to the base of the plant giving a year-round lush, full appearance. It forms a small quantity of creamy-white flowers in summer. Berry production on 'Whisper' is unlike other Lilly Pillies, with minimal quantities of small green berries that, whilst bird attracting, these fruits are tucked in amongst the foliage and are not obvious.

Can be used as a specimen tree in parks and gardens. It is an excellent screening tree and informal hedge. Adds vibrant colour and texture to any garden. Waterhousea is considered a wonderful choice for softening hard urban landscapes. It is an ideal avenue or stand-alone feature tree. 'Whisper' can also be pruned up from the base to raise the canopy (remove lower foliage) to make a feature of its central trunk.

'Whisper' is tolerant of most soils, in a full-sun to part-shade position. It can tolerate occasionally wet conditions and responds well to pruning. Will cope with some frost, as long as not sustained or extreme cold.
